

End Distracted Driving at your workplace once and for all!

Distracted driving causes accidents. Accidents raise the cost of your insurance premiums and increase the cost of doing business. FleetMode fixes this problem at an affordable price for fleets of all sizes.

FleetMode is a three-part solution. A mobile application for your phone, a small hardware beacon for your vehicle, and a manager portal for your computer.

- Our solution is simple. Quick rollout. Easy management.
- Effective at curbing accidents related to your drivers' smartphone.
- Proven to lower operating costs.
- Offers a powerful array of analytics data.

While Driving, FleetMode Will Automatically:

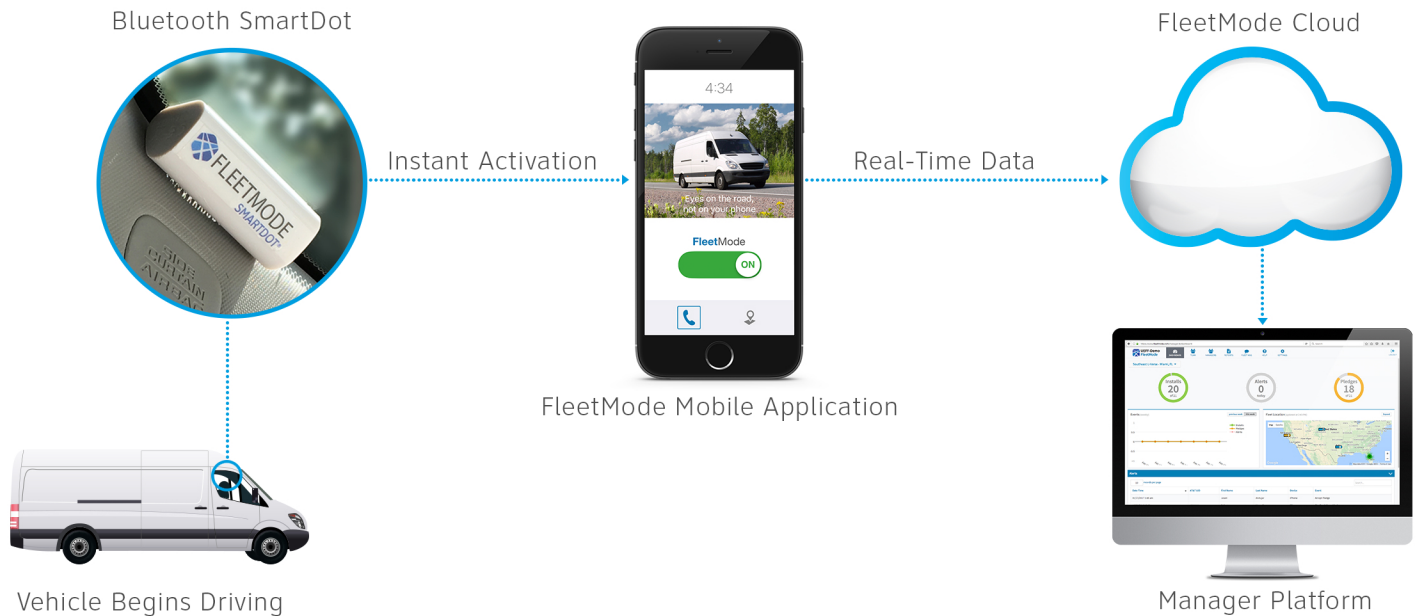

- Silence phone alerts
- Auto-reply to text messages
- Send calls to voicemail (optional)
- Disable drivers keyboard
- Track driver location (optional)
- Collect real-time driver data

Additional Features:

- Compatible on all Apple (iOS) & Android devices
- No need to use OBDII port

How FleetMode Works

1. Vehicle begins driving

FleetMode detects vehicle motion and automatically stops distractions on the drivers mobile device.

2. Driving with FleetMode

- Phone alerts are silenced
- Text messages auto-replied
- Keyboard is locked down
- Calls routed to voicemail (optional feature set)

3. Performance Measured

Drivers remain safe and productive. Location tracking and driving metric reports are available to management.

The Features You Actually Want

Automated Distracted Driving Prevention-

Automatic activation leaves your employees safe to focus on what matters; safe driving!

Works on All Android & Apple (iOS) Devices-

When Apple or Android releases a new update you can be sure FleetMode will always work. Including Smartphones and tablets

Intelligent Privacy Mode-

Separate work from home, our intelligent privacy allows FleetMode to only work in your work vehicle.

Lowest Battery Consumption-

You need your phone; that's why we have the lowest battery consumption in the industry.

Coaching Alerts for Drivers-

Less work for managers. FleetMode provides electronic tools to empower your drivers towards safety.

Powerful Customization-

Do you need some fleets to allow calls and others to block calls? You can customize this feature and many more.
